

Dear Learners

Greetings from TISHADZ

The significance of IFRS is well accepted and acknowledged by all. In another 6 days' time, it will be 10 years since the European Union adopted IFRS. It was on 1st January, 2005 that the transition to IFRS was made from the national accounting standards. Research shows that 114 countries out of 138 countries require the use IFRS for all or most of the public listed companies. In other words, IFRS is becoming the most pre-dominant reporting language across the globe.

In July 2014, our Finance Minister in his budget speech proposed the adoption of the new Indian Accounting Standards (Ind AS – The converged IFRS Standards) by the Indian companies voluntarily from FY 2015-16 and mandatory from FY 2016-17. Understanding IFRS and its implications in a business is becoming imperative for the Indian Companies.

At TISHADZ, the objective is to provide the best resources, faculty and training opportunities to understand and implement IFRS. During our training sessions, we will not only cover the standards as mentioned in ACCA syllabus but also IFRS implementation in India vis-a-vis the Ind AS.

TISHADZ Differentials - Our USP

TISHADZ was started 5 years back and throughout this journey the effort has always been to provide the best training to the learners and solutions to the corporates. The glint of satisfaction in the eyes of the learners has given us unlimited satisfaction and motivation to meet all your expectations.

Here, we believe that sky's the limit. We not only help in directing and motivating the learners to achieve their desired career growth but also equip them to face the practical challenges in life.

1. Course Coverage

Problem: This is the most common problem observed. Generally all the standards are not fully covered or only those standards are covered which are there in the ACCA syllabus.

TISHADZ: We believe that it is necessary for the learner to know about all the standards in detail and not just focus on the ACCA course as it is the knowledge of all the standards in detail which will help in cracking the interview and getting the Job.

2. Structured Format

Problem: Generally the e learning videos are not recorded or presented in an organized manner.

TISHADZ: At TISHADZ, all the videos have a proper structured pattern. We begin with the story behind every standard, its need, Objectives, Key Definitions, Content

along with examples and comprehensive questions followed by Students corner, Memory tips and MCQS to judge your knowledge.

Our 7 step Programmed Learning Methodology (PLM) is considered to be the best and makes TISHADZ IFRS Course as the “First choice” for all the learners.

3. **Concept Clarity**

Problem: The concepts are not explained in detail or are explained in a manner assuming that the learners already know the basics.

TISHADZ: The faculty at TISHADZ know that we tend to forget the concepts over a period of time and so it is important to explain the concepts from the basic grass root level. Hence, even if you are not at a comfort zone with your basic fundamental knowledge...u need not worry at all....!!

4. **Unlimited Access**

Problem: In many eLearning modules of other learning platforms, the access is limited to restricted no. of views.

TISHADZ: There is no such restriction in case of our eLearning modules. Once you purchase our premium model, you can access the videos as many times as needed and desired by you.

5. **Practice questions**

Problem: Learners generally do not get enough number of questions to understand or practice.

TISHADZ: “Practice makes a man perfect”. And so at the end of every standard, you will find a set of multiple choice questions to gain the confidence regarding your learning n understanding of the standard.

6. **Add-ons to enhance learning**

Problem: The eLearning modules only present the explanation of the standard.

TISHADZ: In our course, you will not only get the detailed explanation in a structured form but also our tools to enhance and fasten your learning experience. So, we have:

“Students Corner” highlighting the important points,

“Common Mistakes” that students commit while attempting questions

“Memory Tips” giving ways to learn

“Flash Cards” to test yourself thru fun learning methodology

7. Comprehensive Solutions

Problem: Only theoretical knowledge is disseminated and no guidance is provided for real situations.

TISHADZ: We provide step by step guide for practical implementation of all the comprehensive problems to make application in the real scenario easier and smooth.

8. Revisionary Module n Test Yourself

Problem: After completion of course, there is no way to test yourself and get the confidence to attempt the paper or crack an interview.

TISHADZ: After completion of each standard, we not only have multiple choice questions but also provide learners with 50 comprehensive question module, Revisionary Module and a Test Yourself Kit.

9. Cost Parameters

Problem: The price charged for online sessions are too high and exorbitant.

TISHADZ: We Believe that IFRS course should be Advanced and yet Affordable so that a large number of students and learners can be benefited but without compromising on the quality of content which should be world-class.
